How ShiningRx Works — Your Trusted Pharmaceutical Exporter from Mumbai, India

[How ShiningRx Works](#) | Pharmaceutical Exporter from Mumbai India

When a hospital in Africa needs a cancer medicine it cannot source locally, or a distributor in the Middle East is looking for a reliable supply of specialty injectables, the question they ask is always the same — who can I trust to get this right?

That is exactly the question ShiningRx was built to answer.

Based in Mumbai, India, ShiningRx is a licensed pharmaceutical exporter and supplier specialising in oncology drugs, cancer medicines, TB treatments, and specialty injectables. We supply hospitals, clinics, pharmacies, and distributors across the world — with genuine medicines, complete documentation, and a process that is transparent from the first enquiry to final delivery.

This blog walks you through exactly how ShiningRx works, step by step.

Who Is ShiningRx?

ShiningRx is a Mumbai-based pharmaceutical exporter operating under the tagline **Medicine You Can Trust**. We export a wide range of prescription medicines — with a strong focus on high-demand oncology and specialty drugs such as Darzalex (Daratumumab), Opdivo (Nivolumab), Dupixent (Dupilumab), and Eylea (Aflibercept).

We are located at S-09, Zoom Plaza Premises, Gorai, Borivali West, Mumbai, Maharashtra — one of India's most active pharmaceutical export hubs. Our team handles every aspect of the export process, from sourcing and verification to documentation and cold chain logistics.

Step 1 — You Send Us Your Requirement

Everything at ShiningRx starts with a simple enquiry. A hospital procurement team, a pharmacy distributor, or a healthcare buyer anywhere in the world reaches out to us with three things:

- The name of the medicine they need
- The quantity required
- Their destination country

That is genuinely all we need to get started. You do not need to know the regulatory process, the documentation requirements, or the logistics details. That is our job — and we handle it completely.

You can reach us via our website contact form, by email, or directly on WhatsApp for faster communication.

Step 2 — We Source and Verify the Medicine

Once we receive your requirement, our team immediately begins sourcing. ShiningRx works with a verified network of licensed pharmaceutical manufacturers and suppliers across India — including products manufactured by globally trusted names in the industry.

We do not simply forward whatever is available. Every product we supply goes through a strict internal verification process that includes:

- Confirming the medicine is sourced from a licensed, [WHO-GMP](#) certified manufacturer
- Checking batch numbers, manufacturing date, and expiry date
- Verifying seal integrity and packaging condition
- Confirming availability in the required quantity before committing to the buyer

For temperature-sensitive medicines — including oncology biologics like Darzalex and Opdivo — we additionally confirm that proper cold chain storage has been maintained from the point of manufacture.

Step 3 — [We Prepare Complete Export Documentation](#)

This is one of the most important things ShiningRx does for its buyers — and one of the most commonly underestimated parts of pharmaceutical export.

Medicines cannot be shipped internationally like regular parcels. Every shipment requires a specific set of documents that prove the medicine is genuine, legally exported from India, and compliant with the destination country's import regulations.

For every ShiningRx shipment, we prepare and verify the following documents:

- **Commercial Invoice** — details of the medicine, quantity, value, and parties involved
- **Packing List** — box-by-box breakdown including batch numbers and expiry dates
- **Certificate of Pharmaceutical Product (CPP)** — confirms quality, licensing, and regulatory approval
- **Certificate of Analysis (COA)** — manufacturer-issued quality test results for the specific batch
- **Airway Bill or Bill of Lading** — transport and tracking document for the shipment
- **Cold Chain Temperature Records** — for all refrigeration-sensitive medicines

Different countries have different import requirements, and ShiningRx tailors the documentation package to match the specific regulations of the buyer's country — every single time.

Step 4 — Packaging and Dispatch

Once sourcing and documentation are complete, we move to packaging and dispatch. ShiningRx works with experienced pharmaceutical freight and logistics partners who understand the specific requirements of international medicine shipments.

For standard medicines, we use pharmaceutical-grade outer packaging with proper labeling, tamper-evident sealing, and protective cushioning for transit.

For cold chain medicines — including specialty biologics and oncology injectables — we use temperature-controlled packaging with gel packs and temperature data loggers that continuously record the storage temperature throughout the entire journey, from our warehouse to your facility.

Shipments are dispatched via air freight for urgent or temperature-sensitive orders, or sea freight for bulk orders where timing is more flexible. We provide full tracking details from the moment of dispatch.

Step 5 — Delivery and Ongoing Support

Once the shipment is on its way, we keep you informed. ShiningRx provides shipment tracking updates and remains available throughout the transit period to address any questions.

When your shipment arrives, we are still available. Whether it is a question about documentation for your customs clearance, a follow-up order for the same medicine, or a new requirement entirely — our team responds quickly and treats every enquiry as a priority.

We have buyers who placed a single order with us and now place regular repeat orders because the process worked exactly as we said it would. That consistency is something we work hard to maintain.

What Medicines Does ShiningRx Export?

ShiningRx specialises in some of the most in-demand and hardest-to-source pharmaceutical categories globally. Our core export range includes:

Oncology and Cancer Medicines

- Darzalex 100mg Injection (Daratumumab) — multiple myeloma treatment
- Darzalex Faspro 1800mg Injection (Daratumumab + Hyaluronidase) — subcutaneous administration
- Opdivo 100mg Injection (Nivolumab) — immunotherapy for multiple cancer types
- Opdivo 120mg Injection (Nivolumab) — immunotherapy by Bristol-Myers Squibb

Specialty Medicines

- Dupixent (Dupilumab) — for specialty dermatological and inflammatory conditions
- Eylea (Aflibercept) — for ophthalmic and vascular conditions

TB and Anti-Infective Medicines Available on enquiry based on buyer requirement and destination country regulations.

If you are looking for a medicine not listed above, send us your requirement. Our sourcing network is wide, and there is a strong chance we can help.

Why Source Medicines from ShiningRx?

There are many pharmaceutical suppliers and exporters operating out of India. Here is what makes ShiningRx the choice that buyers come back to:

We verify everything. Every medicine we export comes with a complete, traceable documentation package. You always know exactly what you are receiving, which batch it is from, and when it was manufactured.

We handle the complexity for you. Export documentation, regulatory compliance, cold chain logistics — these are things most buyers do not want to manage themselves. We manage all of it so you can focus on your patients and your business.

We respond quickly. Pharmaceutical procurement is time-sensitive. We treat every enquiry as urgent because we understand there is often a patient waiting on the other side of the order.

We are based in Mumbai. As India's pharmaceutical export hub, Mumbai gives us access to a wide network of verified manufacturers, logistics partners, and regulatory expertise that exporters in other locations simply cannot match.

Our minimum order is accessible. Our standard MOQ starts at 50 boxes per product — making ShiningRx a practical option for hospitals, clinics, and distributors of all sizes, not just large buyers.

Who Does ShiningRx Supply To?

ShiningRx exports medicines to buyers across the globe. Our key markets include:

- **Middle East** — UAE, Saudi Arabia, Kuwait, Qatar, Oman, Bahrain
- **Africa** — Kenya, Nigeria, Ethiopia, Ghana, Tanzania, South Africa
- **Southeast Asia** — Philippines, Vietnam, Bangladesh, Myanmar, Sri Lanka
- **Eastern Europe and CIS countries**

If your country is not listed, reach out anyway. If we can source the medicine and legally export it to your location, we will.

Frequently Asked Questions

1.What is ShiningRx's minimum order quantity?

Our standard minimum order quantity is 50 boxes per product. This can be discussed based on the specific medicine and your requirement.

2.Does ShiningRx handle all export documentation?

Yes. We prepare and verify the complete documentation package for every shipment — including the commercial invoice, packing list, certificate of origin, certificate of pharmaceutical product, and certificate of analysis.

3.How do I know the medicines from ShiningRx are genuine?

Every product we supply comes with a manufacturer-issued Certificate of Analysis confirming batch details, composition, and quality test results. We source only from verified, licensed pharmaceutical manufacturers.

4.Can ShiningRx ship cold chain medicines like Darzalex and Opdivo?

Yes. We use temperature-controlled packaging with continuous monitoring records for all refrigeration-sensitive medicines, ensuring they arrive within the required 2–8°C range.

5.How quickly can I receive my order after placing an enquiry?

After confirming the order and completing documentation, most shipments are dispatched within 48–72 hours. Delivery time to your country then depends on the shipping route and method chosen.

[Send Us Your Requirement Today](#)

If you are a hospital, distributor, clinic, or pharmacy looking for a reliable pharmaceutical exporter from India, ShiningRx is ready to help.

Send us the medicine name, quantity required, and your destination country — and our team will respond within 24 hours with availability, pricing, and a complete export plan.
