

EMAIL CAMPAIGN AND BLOGS

EMAIL CAMPAIGN :-

Target Audience for This Campaign

This type of post is best for:

Pharmacy owners, Hospital procurement teams, Medical distributors / wholesalers, Importers of pharmaceutical products, Healthcare purchasing managers

👉 Basically: people who already buy pharma products but want a better supplier

The screenshot displays the Brevo web application interface for creating an email campaign. On the left is a sidebar with navigation links: Home, CRM, Marketing, Campaigns (highlighted), Landing pages, Forms, Statistics, Automations, and Transactional. The main content area is titled 'Create an email campaign' and includes a sub-header 'Create an email campaign'. Below this, there are two tabs: 'Regular' (selected) and 'A/B Test'. A descriptive text states: 'Keep subscribers engaged by sharing your latest news, promoting your bestselling products, or announcing an upcoming event.' The 'Campaign name' field contains 'Start Your Digital Career Today' with a character count of 31/128. The 'Tags' field is labeled 'Select tags'. Below this, the campaign details are shown in a list format: 'Sender' (Medicine You Can Trust, shiningrx57@gmail.com, with a 'Manage sender' button), 'Recipients' (1 recipients, 300 remaining emails, with a 'Manage recipients' button), 'Subject' (Are You Asking These 4 Questions to Your Pharma Supplier?, with a preview and an 'Edit subject' button), and 'Design' (Create your email content, with a 'Start designing' button). The bottom of the image shows a Windows taskbar with various application icons and a system clock indicating 12:42 PM on 4/13/2026.

Hello sir,

Choosing a pharmaceutical supplier isn't just about pricing — it's about reliability, quality, and trust.

But here's the question:

Are you asking the right questions before choosing your supplier?

Here are 4 essential questions every pharmacy, hospital, and distributor should ask:

- ✓ Is the pricing truly competitive?
- ✓ Can they deliver quickly — even globally?
- ✓ Do they provide real customer support when needed?
- ✓ Are their products properly tested and verified?

These questions may seem simple, but they can make a huge difference in your day-to-day operations and long-term success.

At ShiningRX, we built our entire system around answering these questions with confidence — so our partners never have to worry.

We are a **Mumbai-based manufacturer, distributor, and exporter**, serving clients worldwide with a strong focus on consistency and reliability.

💡 Because in healthcare, the right supplier doesn't just support your business — it supports patient care.

If you're reviewing your current supplier or planning to expand your sourcing options, we'd be happy to connect.

TOPIC :- modafinil vs modaheal vs modivigil vs artivigil? — Which Smart Drug Is Right for You?

Are you confused about modafinil vs modaheal vs modivigil vs artivigil? You are not alone. Many pharmacies, hospitals, and buyers ask us the same question every day. All four belong to the same medicine family. However, they differ in brand, manufacturer, and in one case, the active molecule itself.

At ShiningRX, we supply all four products to pharmacies and distributors worldwide. In this guide, we explain each one clearly so you can make the right choice.

What Is Modafinil and Why Is It So Popular?

Modafinil is a wakefulness-promoting medicine. Doctors prescribe it mainly for narcolepsy, obstructive sleep apnea, and shift work sleep disorder. However, its popularity has grown far beyond clinical use.

Many professionals now use it as a cognitive enhancer. It helps people stay alert, focused, and mentally sharp for 10 to 15 hours. Unlike caffeine, it does not cause jitteriness. Unlike amphetamines, it does not cause a crash afterwards. Because of this, demand for modafinil has grown rapidly across the world.

India is one of the largest producers of modafinil generics globally. Therefore, sourcing from an Indian supplier like ShiningRX gives you access to authentic stock at competitive prices.

Modafinil 200mg — The Standard Generic

Modafinil 200mg is the entry-level generic version of the branded drug Provigil. It contains modafinil as its active ingredient at the standard 200mg dose.

It starts working within 30 to 60 minutes. The effects last between 10 and 15 hours. It can be taken with or without food, which makes it convenient for most patients.

Who should use it? It is the right choice for clinical patients with narcolepsy or sleep apnea. It is also ideal for pharmacies that want the most widely recognised generic name at the lowest cost.

ShiningRX stocks this product and ships it internationally with full export documentation.

Modaheal 200mg — The Trusted Export Brand

Modaheal 200mg is manufactured by Healing Pharma, one of India's leading pharmaceutical companies. It contains exactly the same active ingredient — modafinil 200mg. However, Healing Pharma's WHO-GMP certification and strong export reputation make it a preferred choice for international buyers.

The onset and duration are the same as standard modafinil. You get the same therapeutic effect. But you also get the added confidence of a well-known, certified Indian manufacturer behind the product.

Because of this, Modaheal is one of our most frequently exported modafinil products. Pharmacies in Africa, Southeast Asia, and the Middle East regularly order it from ShiningRX.

Who should use it? It is the best choice for pharmacies and distributors who want a reliable, export-ready modafinil generic from a trusted manufacturer.

Modivigil 200mg — The Nootropic Community Favourite

Modivigil 200mg is manufactured by HAB Pharmaceuticals, another prominent Indian pharma company. Like Modaheal, it contains modafinil 200mg. So the clinical effects are identical.

However, Modivigil has developed a strong reputation in the global nootropic and cognitive enhancement community. It is one of the most discussed modafinil brands on international health forums. Many professionals request it by name specifically.

Therefore, if your pharmacy or distribution business caters to the cognitive enhancement market, Modivigil is the brand to stock. It is our single most popular modafinil product by order volume.

Who should use it? Nootropic buyers, pharmacies serving professionals and students, and distributors targeting the cognitive performance market.

Artivigil 150mg — The Next-Generation Option

Artivigil 150mg is different from the other three. While the first three all contain modafinil, Artivigil contains armodafinil — a closely related but distinct molecule.

So what is the difference? Modafinil is a mix of two mirror-image molecules. Armodafinil is the pure, more active form of just one of those molecules. Because of this, Artivigil at 150mg delivers effects that are comparable to — or stronger than — modafinil at 200mg.

There are two key advantages. First, the effects last slightly longer — 12 to 15 hours instead of 10 to 15 hours. Second, many users report a smoother, more focused effect with less of a "peak and dip" sensation.

The branded version of armodafinil is called Nuvigil. Artivigil is its Indian generic, manufactured by HAB Pharma to the same quality standards.

Who should use it? Patients who found 200mg modafinil too strong. Also ideal for buyers who want a premium, next-generation option to add to their portfolio.

Which One Should You Choose?

Here is a simple way to decide.

Choose Modafinil 200mg if you want the most affordable generic for clinical narcolepsy or sleep apnea patients.

Choose Modaheal 200mg if you are a pharmacy or distributor who wants a well-certified, export-ready modafinil generic from a trusted Indian manufacturer.

Choose Modivigil 200mg if your market includes professionals, students, or nootropic buyers. It is the most requested modafinil brand globally by name.

Choose Artivigil 150mg if your patients or customers want a longer-lasting, smoother effect — or if they found standard modafinil too intense.

All four are available at ShiningRX. You can order any combination depending on your market needs.

Important Safety Information

Modafinil and armodafinil are Schedule H prescription medicines in India. They require a valid prescription for dispensing. ShiningRX supplies these products exclusively to licensed pharmacies, hospitals, and registered healthcare institutions.

Patients should always take these medicines in the morning or one hour before their shift. Taking them in the afternoon or evening will cause difficulty sleeping. These medicines are not recommended for patients under 18 years of age without specific medical guidance.

How to Enquire at ShiningRX

Getting in touch with us is simple. We respond to all enquiries within 24 hours.

WhatsApp: +91 7021094130 Email: shiningrx57@gmail.com Website: shiningrx.com Office: S-09, Zoom Plaza, Gorai, Borivali West, Mumbai — 400092 Hours: All days, 9 AM to 9 PM IST

Frequently Asked Questions

Is Modaheal the same as Modafinil?

Yes. Modaheal 200mg contains modafinil 200mg as its active ingredient. The difference is the manufacturer. Healing Pharma produces Modaheal under WHO-GMP certification.

Is Modivigil better than Modaheal? Both contain the same molecule at the same dose. Modivigil is more popular in the nootropic community. Modaheal is preferred by institutional and export buyers. Neither is clinically superior to the other.

Is Artivigil stronger than Modafinil? Artivigil contains armodafinil, which is a more refined version of the modafinil molecule. At 150mg it delivers comparable or stronger effects than modafinil at 200mg. It also lasts slightly longer.

Which modafinil brand is best for export from India? All four are available for export from ShiningRX. Modivigil and Modaheal are our most frequently ordered brands by international pharmacies. Contact us for current pricing and availability.

Can I take modafinil every day? For clinical conditions like narcolepsy, modafinil is prescribed for daily use. For cognitive enhancement, many users take it two to three times per week to avoid tolerance. Always follow the advice of a qualified physician.
